

DISTORTIA

model name

For women who like to hit the park and are looking for a solid board with crazy pop and enough forgiveness that makes you progress easily to the next level. The Distortia comes with a slimmed down version of our successful Twin TBT shape that is suited for petite feet shredders with an insert pattern that allows you to rock that wide stance. This is for all you girls who are truly passionate about your riding and don't just look for a pretty graphic to match your pants. You don't ride the park to just hang out, you ride the park to rip and that's just what this stick does.
