

# VIOLENZA

model name

Can you have a super forgiving board that still performs like a high-end snowboard? With the Violenza decked out with our patented Triple Base Technology you can. Just because you are a woman doesn't mean you should ride an inferior board right? We never understood this part of snowboard industry logic so we offer you a board that is as good as its male counterparts but with a bit more added flex. Soft enough to be forgiving but not too soft cuz this board will progress your riding so fast that soon you will not be the same rider as when you first strap to this. This board is made to be your friend that grows with you as you progress.
